DETAILED ACTION

Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1,2,6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Dent(US 5,983,077 new cite).

The reference by Dent et al disclose a PLL circuit, see figure 2, with an analog modulation signal input(output of 105), and a digital modulation signal input(via 104), comprising the two-point modulation.

A summation point(receiving the analog mod signal(from 105) and error control signal from (102)) is shown coupled to the input of the VCO, and a feedback path is shown with divider(freq. Divider). A trimming device(including scaling(104)) is shown, see figure 2, with an evaluation means(200) and controller/DAC(105) for modulating the analog modulation signal(via direct modulation signal). The charge pump is inherent in the loop(see col. 5, line 4) and the LPF(101) is connected down stream of the PFD and charge pump. The method steps being inherent.

Allowable Subject Matter

3. Claims 3,4,5, 8, and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2817

The examiner could not find fair suggestion for comparing the signal characteristic of the error contro value with a fixed reference value ...

Any inquiry concerning this communication or earlier communications from the examiner should be directed

to Arnold M Kinkead whose telephone number is 571-272-1763. The examiner can normally be reached on Mon-Fri,

8:30 am -5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal

can be reached on 571-272-1769. The fax phone number for the organization where this application or proceeding is

assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information

Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or

Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more

information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the

Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
